An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. George Metzinthin on 2/17/2010.

In the specification:

Paragraph [0001] has been rewritten as follows:

--[0001] This application is a continuation of U.S. App. Ser. No. 10/377,602, filed on March 4, 2003, now US Patent 6740032, which is a continuation of U.S. App. Ser. No. 09/844,434, filed on April 30, 2001, now Pat. No. 6,530,884, which is a continuation-in-part of PCT Application No. PCT/US99/20092, filed September 3, 1999 (which designates the United States and was published on May 11, 2000), which claims priority from U.S. provisional Application Serial No. 60/106,419, filed October 30, 1998, and U.S. provisional Application Serial No. 60/122,407, filed March 2, 1999; and U.S. App. Ser. No. 09/844,434 claims the benefit of U.S. provisional Application Serial No. 60/273,540, filed March 7, 2001. These patent applications are hereby incorporated by reference. --

In the claims:

In claim 2, line 6, the phrase – wherein there are multiple intervals in each 24 hour period --.

Art Unit: 3735

This claim was amended to define over the Akerstedt article by reciting that each 24 hour period had multiple fixed intervals with an identical time period. It is the examiner's position that one would use the device of Akerstedt daily, so that there would be data gathered for a 24 hour period, but not multiple equal length periods within a 24 hour period.

In claim 3, line 2, the words -- stored on a computer readable medium -- have been added after the word product.

This change has been made in that a program product is not, per se, statutory. Storing the product on a computer readable medium makes it statutory.

In claim 3, line 9, the words -- equal length -- has been added before the word epoch.

In claim 39, line 3 the words -- equal length -- has been added before the word epoch.

In claim 41, line 3 the words -- equal length -- has been added before the word epoch.

These changes were made to echo applicant's arguments that an epoch each epoch was of the same length, while in Akerstedt, the data was grouped into sleep and wake intervals, but there is no guarantee that the intervals had the same length.

The following is an examiner's statement of reasons for allowance:

Claims 1, 40, 44, and 45 define over the art in that none of the art uses the model of circadian rhythm using two sinusoids, one for 24 hours and one for 12, as claimed.

Claims 2 and 37-38 define over the art in that none of the art calculates the cognitive level for multiple, equal length intervals in a 24 our period, as claimed.

Claims 3, 39, 41, 42, and 46 define over the art in that none of the art uses a series of epochs classified as sleep or wake, where the epochs are of equal lengths of time.

Claim 35 defines over the art in that none of the art uses the claimed formulas.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT L. NASSER whose telephone number is (571)272-4731. The examiner can normally be reached on m-f 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor II can be reached on 571 272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
